

**Grade One teacher preparation:**

- January:** Teacher preparation – Templates for the mask are in the MTM file cabinet. Trace mask shape onto tagboard. Can pre-cut or let the students cut mask. Pre-cut the tissue paper into geometric shapes. There often is a supply of leftovers in the MTM storeroom.
- February:** Teacher preparation – Cut open one large brown paper bag for each student.
- March:** Teacher preparation – Make sure there is the correct light brown construction paper for this project in the MTM file drawer and cardboard cut for the base.
- April:** Teacher preparation – Cut and punch holes around the side of the tagboard. **After** the children are done, teacher will need to “sew” the squares together with yarn and display like a quilt.
